

Brutus

Brutus from HSR is a 105 CRM dual-purpose maize.

Brutus is a hybrid that has extremely high water use efficiency and exceptional yield for its maturity. It has an early-season growth habit that allows versatility and flexibility in sowing and harvest. It is designed for the maize grower who wants a crop that stands well, with an excellent silage yield quality, and delivers a high grain yield. It can be grown in a wide range of environments throughout New Zealand. Growers in warmer regions looking for a high-yielding, excellent disease tolerant and standability package in a mid-maturing maize hybrid should be growing Brutus.

Planting population

85,000 to 100,000 seeds/ha (GRAIN 75-100K)

 <p>Plant type: 105CRM silage or grain.</p>	 <p>Yield potential: Excellent yield with a robust disease package.</p>
 <p>Plant height: Tall plant with large root structure for high water use efficiency.</p>	 <p>Grain type: Dent x Dent. Highly digestible feed grain. High starch in silage and grain.</p>

General comments: Solid yields under various conditions.
