

Known as “The Pillar of Strength” Obelix is proving to be a winner on farm here in New Zealand and Australia after its success in the HSR trial programmes.

Obelix is a 92 CRM hybrid developed by the HSR team of global breeding partners to fill this maturity space within our hybrid range. With its great stature and cob placement, coupled with quick cob turn down, it is also proving to be a winner with grain growers. Obelix shows strong disease resistance and is suitable for growing in all North Island regions. A solid performer with extreme early growth.

Planting population

90,000 to 105,000 seeds/ha (GRAIN 75-100K)

 <p>Plant type: 92CRM early silage or grain.</p>	 <p>Yield potential: Great yields within a specific growing window.</p>
 <p>Plant height: Tall with a large root structure for high water use efficiency.</p>	 <p>Grain type: Dent x Dent. Highly digestible feed grain. High starch content in silage and grain.</p>

Trait scores

General comments: Obelix shows strong disease resistance and is suitable for growing in all North Island regions. Ideal for planting/harvesting outside of key operating window in Northern Regions. Obelix is a solid performer.
