

# Asterix NEW

Introducing HSR's 85CRM "starchy silage".

Great for very quick Silage or Grain to fill that void these tough seasons can create, or for planting/harvesting outside of key operating window in North Island regions. Showing great results in Southern regions where this fits into the growing window. Growers seeking high yield at this CRM with excellent standability and disease tolerance, should be growing *Asterix*.

**PLANTING POPULATIONS**

**90,000 TO 110,000** seeds/ha  
(GRAIN 75-100K)

**Plant Type:**  
85 CRM Early silage quick Grain.

**Yield Potential:**  
Excellent yield potential for a short CRM with a solid disease package.

**Plant Height:**  
Medium plant with solid root structure.

**Grain Type:**  
Dent x Flint. Highly digestible feed grain. High grain content as silage or grain.

**General Comments:**  
Quick yields that fit a specific purpose.
