

Pegasus NEW

Bred for yield, disease tolerance and adaptability. A medium to tall leafy plant with large, bright yellow kernels, this hybrid is a true 'dual purpose' that finds a fit with both silage and grain growers but will have a silage focus for the New Zealand market.

Characterised by a large cob, the dent x flint grain this hybrid produces is of medium density... perfect for feed grain or high quality silage. Above average stress tolerance enables this variety to hold on when the going gets tough!

PLANTING POPULATIONS

90,000 TO 100,000 seeds/ha
(SILAGE 80-90K) (GRAIN 80-90K)

Plant Type:

115 CRM Silage or Grain

Yield Potential:

Excellent yields with strong disease package.

Plant Height:

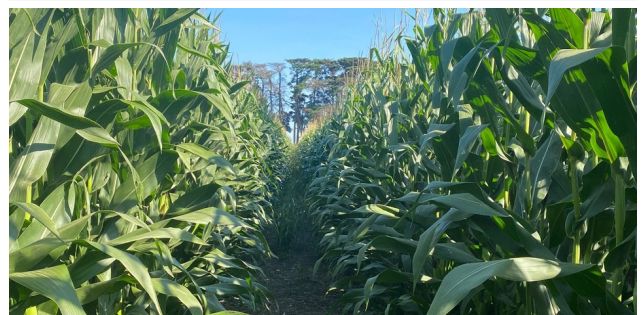

Medium to tall leafy plant with large bright yellow kernels.

Grain Type:

Large cobs of medium density dent x flint grain perfect for feed grain or high quality silage.

General Comments:

Above average stress tolerance enables this variety to hold on when the going gets tough!
